An important goal of this year’s symposium is to create new cross campus and community collaborations. To achieve this, the program is designed to expose participants maximally to potential collaborators and their ideas. This will be accomplished through:

- A block of time for academic speed dating in which participants speak very briefly one on one to all other participants
- Lightning talks, in which participants briefly pitch an idea that they believe is appropriate for cross campus collaboration
- Poster session in which participants convene with potential collaborators to discuss their ideas further
**Thursday | April 11th, 2019 | Atrium**

**12:30pm–12:45pm**
